

MIL-DTL-38999, EN3646, EN2997 Fuel Tank Connector

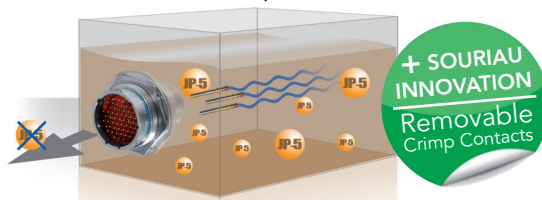

Hermetic Fuel Tank Connector with Removable Contacts

Removable crimp contacts associated with hermetic design and materials suitable for continuous fuel immersion makes the connector ideal for tank wall applications.

High hermetic performance ■ Glass to metal sealing:
leakage of less than 10^{-9} atm.cm³/s

Removable crimp contacts ■ A unique technology combining crimp contacts with glass sealing:
. RoHS: no lead used
. Long lifetime: superior to solder cup contacts especially in kerosene immersion
. Easy MRO: easy contact replacement.

Long term immersion materials ■ Performance warranted for minimum 90,000 hrs in fuel immersion. Temperature 105° max.

Wide Availability ■ EN3646 (Airbus Qualified Products)
EN2997, EN3645, MIL-DTL-38999.
